AN ACT
AUTHORIZING THE PRESIDENT TO EXPEDITE THE PROCESSING AND
ISSUANCE OF NATIONAL AND LOCAL PERMITS, LICENSES AND CERTIFICATIONS

EXPLANATORY NOTE

In the World Bank’s 2020 Doing Business Report, Philippines jumped 29 notches, ranking 95th from 124th last year. The Philippines got an Ease of Doing Business score of 62.8 in the 2020 report, an improvement over its grade in the previous year of 57.68. Based on the report, the Philippines improved on three areas: starting a business, dealing with construction permits, and protecting minority investors. Although it was a big leap from the previous year’s the Philippines is still last in the ranking among the founding members of Southeast Asian Nations.

According to some reports in 2019, the Philippines is a top foreign investment destination largely attributable to its continuing digital transformation and combined information and communications technology (ICT) and infrastructure efforts. Furthermore, based on an article published by the Philippines News Agency on December 30, 2019, Philippine economy is still among Asia’s fastest amid easing inflation. The Philippine gross domestic product (GDP) accelerated by 6.2 percent in third quarter, making it the second fastest-growing major economy after Vietnam, and ahead of China, India, Malaysia, Indonesia, and Thailand.

Moreover, prior to the COVID-19 pandemic, according to the Department of Finance, the Philippines entered 2020 with strong growth prospects due to the conservative and responsible fiscal management and tax reform measures, just to name a few factors. The Philippines is even said to be among the fastest growing economies, with a revenue of 16.1% of gross domestic product (GDP), which is the country’s highest since 1997.

However, the economic landscape of the Philippines has drastically changed by reason of the pandemic. The impact of COVID-19 to the different sectors of our society are all
unprecedented. The Philippine economy is forecast to contract by 7.3% in 2020 amid the COVID-19 pandemic, according to the Asian Development Bank. While this has been has emerged as among Asia’s strongest currencies owing to the country’s mild inflation rate.

Uncertainties surrounding the COVID-19 pandemic, although have been lessened, still exist. Measures to cushion its effect to our people and our economy have already been made. However, there are still a lot to be accomplished in order to rebuild the economy and defeat COVID-19 altogether.

Thus, this bill seeks to authorize the President, during the time of national emergency, to suspend the requirements for national and local permits, licenses and certifications, and to streamline and expedite the process for the issuance of the same. While this may be a small step, it surely can create a significant impact on all enterprises. Likewise, this move could ease the already heavy burden of the businesses that were heavily hit and continuously being beaten by the gargantuan effects of the pandemic. This Act could be one of the needed breathers of the crumbling enterprises. And ultimately, this will redound to the benefit of our economy and encourage investors to capitalize in the country.

The COVID-19 virus is spreading fast, so our action must likewise be swift. Therefore, the immediate passage of this measure is earnestly sought.
