EXPLANATORY NOTE

Article II, Section 15 of the 1987 Constitution provides that, "The State shall protect and promote the right to health of the people and instill health consciousness among them."

Regular physical activity is proven to help prevent and manage noncommunicable diseases (NCDs) such as heart disease, stroke, diabetes and several cancers and also helps prevent hypertension, maintain healthy body weight and can improve mental health, quality of life and well-being. World Health Organization however reports that current global estimates show one in four adults and 81% of adolescents do not do enough physical activity. Considering the many benefits of physical activity and its overall impact to an individual's health, the government must adopt measures to promote physical fitness among its citizens to ensure a healthier citizenry.

For children and adolescents aged 5 to 17 years, WHO recommends at least an average of 60 minutes per day of moderate-to-vigorous intensity, mostly aerobic, physical activity, across the week. Presently, educational institutions under the K-12 basic education curriculum provide students physical education classes but are rather limited with Grades 1-10 students only being allotted 40 minutes to 60 minutes of physical education classes each week. Moreover, these classes are also used for lectures, class discussions and examination, further reducing the time allotted for physical activity. Considering that students spend most of their time at schools, educational institution must ensure that they are allotted sufficient time for physical activity.

In this light, this measure seeks to require educational institutions, both private and public to incorporate at least two (2) hours of physical education a week to the curricula of students in all levels of basic education. These mandated two (2) hours shall be entirely dedicated to actual physical activities.

On behalf of the people of Parañaque City's Second District, and for the common good of the Filipino people, the approval of the said measure is earnestly sought.
