NINETEENTH CONGRESS
First Regular Session
House Bill No. **5514**

Introduced by **Hon. ROSANNA "RIA" V. VERGARA**

EXPLANATORY NOTE

The Philippine Crop Insurance Corporation (PCIC) is a government owned and controlled corporation created under PD 1467. It was later amended by PD 1733 and further amended by RA 8175. It is the implementing agency of the government's agricultural insurance program. PCIC is an attached agency of the Department of Agriculture and its principal mandate is to provide insurance protection to farmers against losses arising from natural calamities, plant diseases and pest infestations of their crops.

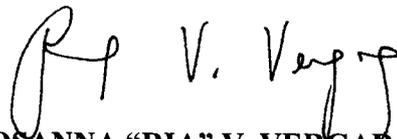

Under RA 8175, crop insurance remains optional for self-financed farmers and is only mandatory upon farmers obtaining production loans for palay under the supervised credit program. Thus, with the current law, only financial institutions remained secure and a majority of the farmers, those who obtain loans outside the supervised credit programs or the so called self-financed farmers, are unsecured. Moreover, other major problems have again resurfaced. Farmers are continuously affected by disasters resulting to diminishing agricultural production and pose a serious threat to the country's food security. For example, the National Disaster Risk Reduction and Management Council (NDRRMC) reported that typhoon Pedring damaged Php9.437 billion worth of agricultural products and properties, while typhoon Quiel's destruction was estimated at Php115 million. Whereas the PCIC's preliminary assessment showed about Php333.93 million worth of crops were insured in 30 provinces covering the entire Luzon. The insured crops of Php 334 million only represents 3% of the almost Php10 billion in damages from the 2 mentioned typhoons.¹

The problem with the PCIC is that it has continually failed to adequately protect our subsistence farmers from the rigors of calamities, often paying far less than what the actual value of the projected harvest is. This bill seeks to amend the PCIC Charter to require insurance payment that reflects the actual cost incurred and/or the value of the projected harvest of our farmers. It is only by properly compensating the farmers that will we fully protect their interest and those of their families. This is very much needed at present and in the years to come considering the devastation brought about by climate change which has led to stronger typhoons and more unpredictable weather patterns.

It is important to note that the Honorable Members of the 17th Congress recognized the importance of this proposed amendment and saw how greatly it would benefit our farmers. In fact, on 29 January 2018, this bill was approved by the House of Representatives on its third reading and was transmitted to the Senate on 31 January 2018.

In light of the foregoing, the immediate passage of this bill is earnestly requested.
