**NINETEENTH CONGRESS**  
First regular Session

**HOUSE BILL NO. 7003**

---

**Introduced by REPRESENTATIVE JEYZEL VICTORIA C. YU**  
2<sup>nd</sup> District, Zamboanga del Sur

---

#### **EXPLANATORY NOTE**

The Science Act of 1958 created National Science Development Board (NSDB) now known as the Department of Science and Technology (DOST). The same law created the Philippine Atomic Energy Commission (PAEC) now known as the Philippine Nuclear Research Institute (PNRI) to promulgate rules and regulations to ensure the safe use and application of radioactive materials in different fields of application. This law was enacted with the objective of protecting the public health, safety, security, and the environment from potential damage resulting from activities involving radiation and nuclear/radioactive materials. Ten years later when the government decided to pursue the nuclear power option, the Atomic Energy Regulatory and Liability Act of 1958 or the Republic Act 5207 was enacted to provide the licensing and regulation of atomic energy facilities and materials, establishing the rules on liability for nuclear damage and other purposes.

In 1987, Executive Order No. 128 was enacted reorganizing PAEC and renamed Philippine Nuclear Research Institute (PNRI) which was placed under the Department of Science and Technology (DOST) of the new government (Reorganizing the National Science and Technology Authority). Up until now, the PNRI oversaw both promotional and regulatory activities in the country. Given these dual responsibilities, there has been increasing concerns on whether the PNRI is effective and objective in regulating all nuclear materials and activities for peaceful purposes in the country.

On the other hand, the Center for Device Regulation, Radiation Health and Research/CDRRHR (formerly Bureau of Health Devices and Technology/BHDT) was created under the Food and Drug Administration (FDA) of the Department of Health (DOH) through Republic Act No. 9711. The Radiation Health Division of the CDRRHR was established given the following powers and functions, among others, over the use of radiation devices to regulate the use of ionizing and non-ionizing radiation devices in medicine, dentistry, veterinary medicine, commerce and industry, education and training, research, anti- crime, security, household activities, and all other facilities/establishments and activities where radiation devices are used.

The need for a separate organization, whose sole concern would be nuclear safety, security and safeguards, separate from promotional, political and economic influences, becomes apparent. The Philippines through the PNRI has been considering revisions to the country's nuclear and radiation laws. The primary purpose of these revisions would be to reflect internationally acceptable practices and to ensure that the Philippine national legislative and regulatory framework is consistent with the nation's obligations under relevant international instruments. Furthermore, it must ensure and provide an adequate basis for further development of nuclear technology for peaceful purposes.

The proposed bill will provide a legal framework for conducting activities related to nuclear energy and ionizing radiation in a manner which adequately protects individuals,

property and the environment. The proposed bill will address all the gaps and omissions identified in reviewing the current legislative framework (under RA 5207) in the areas system of physical protection, safeguards, nuclear security, nuclear/radiological emergency preparedness and response, radioactive waste management, licensing of nuclear facilities, nuclear materials and radioactive sources, including those in PNRI, and transport of nuclear/radioactive materials. The proposed creation of a single regulatory body, the Philippine Nuclear Regulatory Commission (PNRC), will ensure effective independence of the regulatory functions for control of all sources of ionizing radiation for the safety and security of the public, and for protection of the environment. This will harmonize with the structure in most countries especially in the Asia-Pacific region such as China, Indonesia, South Korea, Japan, Malaysia, Thailand, Pakistan, India, Australia, New Zealand, Singapore, and Vietnam. The proposed law will modernize the current laws governing the control of nuclear, radioactive, ionizing radiation sources. It will ensure consistency with the nation's obligations under relevant international instruments.

Under the FDA Law or “Food and Drug Administration Act of 2009”, CDRRHR's mandate is only limited to the regulation of devices emitting ionizing and non-ionizing radiation in both non-medical and medical applications. It will not address the elements included in the proposed bill such the issues on nuclear security, physical protection, radioactive waste management, among others.

The PNRI proposes for the creation of a single nuclear regulatory body with effective independence - the Philippine Nuclear Regulatory Commission (PNRC) under the Department of Science and Technology (DOST). The proposed bill provides the most appropriate and effective approach for the Philippines to modernize and strengthen its legal framework for nuclear safety, security and safeguards. The proposed legislation will provide for the establishment of a regulatory framework that will decide on issues affecting public health and the protection of the environment, safety, nuclear security and safeguards, outside of the influences of other groups with political, economic or social interests. These main issues of regulatory independence will generate in the public higher levels of trust and confidence in the application of nuclear technologies, which is a requisite for the continued use of nuclear energy and radioactive materials in the country.

Thus, passage of this bill is earnestly sought.

  
JEYZEL VICTORIA C. YU

Republic of the Philippines  
**HOUSE OF REPRESENTATIVES**  
Quezon City

**NINETEENTH CONGRESS**  
First regular Session

**HOUSE BILL NO. 7003**

---

Introduced by **REPRESENTATIVE JEYZEL VICTORIA C. YU**

---

**AN ACT**  
**PROVIDING FOR COMPREHENSIVE ATOMIC REGULATION, CREATING FOR THE**  
**PURPOSE, THE PHILIPPINE ATOMIC REGULATORY COMISSION, AND**  
**APPROPRIATING FUNDS THEREFOR**

*Be it enacted by the Senate and House of Representatives of the Philippines in Congress assembled:*

**ARTICLE I**

**GENERAL PROVISIONS**

**SECTION 1. *Short Title.*** – This Act shall be known as the “Comprehensive Atomic Regulation Act”.

**SECTION 2. *Declaration of Policy.*** – It is hereby declared to be the policy of the State to:

- a. Harness the peaceful uses of nuclear energy that can provide important benefits in many fields, including health and medicine, energy production, scientific research, agriculture, industry, and education;
- b. Recognize the potentially harmful effects of ionizing radiation resulting from improper use, accidents, and/or malicious acts, as well as determine the doses of radiation for which these ill-effects disappear or become beneficial;
- c. Protect individuals, society, and the environment from the potentially harmful effects of ionizing radiation, including those resulting from improper use, accidents or malicious acts;
- d. Establish and maintain a legal and regulatory framework for the regulation and control of peaceful uses involving radiation sources, nuclear material, and any other radioactive material;
- e. Manage radioactive waste in a manner that protects current and future generations from undue impacts; and,
- f. Establish and maintain a legal and regulatory framework for implementing effective measures to prevent, detect, and respond to unauthorized acts involving nuclear material, other radioactive sources, or associated facilities that may cause injury to persons, property or the environment or otherwise jeopardize national security.

**SECTION 3. Objectives.** – The objectives of this Act are:

- a. To provide a legal framework that adequately protects public health and safety and the environment against the harmful effects of ionizing radiation, and for the safety and security of radiation sources;
- b. To establish the Philippine Atomic Regulatory Commission (PARC), for the purpose of exercising regulatory control over the peaceful uses of ionizing radiation in the territory or area under the jurisdiction or control of the Republic of the Philippines, including the production, possession, use, import, export, transport, transfer, handling, and management of radioactive materials, nuclear materials or any other activities or practices identified by the PARC;
- c. To establish and maintain a regulatory system for the formulation and/or adoption of regulations and guides on the use of ionizing radiation that specify the principles, requirements, and associated criteria for safety and security upon which regulatory judgments, decisions, and actions are based; and
- d. To enable the Philippines to fulfill its obligations under relevant international instruments entered into by the Philippines, in particular, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT); the Treaty on Southeast Asia Nuclear Weapon-Free Zone; Comprehensive Test Ban Treaty; the Agreement between the Philippines and the International Atomic Energy Agency (IAEA) for the Application of Safeguards in Connection with the NPT (the Safeguards Agreement); Additional Protocol to Safeguards Agreement; Vienna Convention on Civil Liability for Nuclear Damage; Agreement on the Privileges and Immunities of the IAEA; Convention on the Physical Protection of Nuclear Material, UN Resolutions on Nuclear Security, and other relevant international instruments entered into by the Republic of the Philippines.
- e. To take cognizant on the pending conventions signed by the Philippine Government such as the Amendment to the Convention on Physical Protection of Nuclear Materials, International Convention on the Suppression of Acts of Nuclear Terrorism, Convention on Nuclear Safety and Joint Convention on the Safety of Spent Fuel Management and on the Safety of Radioactive Waste Management.

**SECTION 4. Scope, Exemptions and Exclusion.**

- a. This Act shall apply to all activities and practices involving the peaceful uses of nuclear energy and other radioactive materials, facilities and radiation generating equipment.
- b. This Act shall not apply to activities or practices involving exposures that have been excluded from regulatory control through regulations established by the PARC.
- c. This Act shall not apply to regulations of sources of non-ionizing radiation.

**SECTION 5. Definitions.** – As used in this Act:

- (a) **Activity and Radioactivity** refers to the amount of radionuclide produced in a given energy state at a given time;
- (b) **Activities** refer to the design, manufacture, construction, import, export distribution, sale, loan, commissioning, use, operation, maintenance, repair, transfer, decommissioning or possession of nuclear materials and radiation sources for industrial, energy production, education, research, agriculture and medical purposes; the transport of radioactive materials; the mining and processing of radioactive ores; the closing down of associated facilities; the clean-up of sites affected by the residues from the past activities; and radioactive waste management activities such as the discharge of effluents and such other activities as the PARC shall from time to time determine;
- (c) **Atomic** refers to any process related to the atom, the basic building block of matter;
- (d) **Authorization** refers to a written permission granted by the PARC to a person who has submitted an application involving nuclear and radioactive materials and associated facilities, and ionizing radiation generating equipment. The authorization can take the form of a notification, a registration, or a license;
- (e) **Decommissioning** refers to the administrative and technical actions taken to allow the removal of some or all of the regulatory controls from a facility to ensure the long term protection of the public and the environment, and typically include reducing the levels of residual radionuclides in the materials and on the site of the facility so that the materials can be safely recycled, reused or disposed of as exempt waste or as radioactive waste and the site can be released for unrestricted use or otherwise reused;
- (f) **Emergency Plan** refers to a description of the objectives, policy, and concept of operations for the response to an emergency and of the structure, authorities and responsibilities for a systematic, coordinated and effective response. The emergency plan serves as the basis for the development of other plans, procedures and checklists;
- (g) **Emergency Preparedness** refers to the capability to take actions that will effectively mitigate the consequences of an emergency for human health and safety, quality of life, property, and the environment;
- (h) **Emergency Response** refers to the performance of actions to mitigate the consequences of an emergency for human health and safety, quality of life, property, and the environment;
- (i) **Exclusion** refers to the deliberate excluding of a particular category of exposure from the scope of an instrument of regulatory control on the grounds that it is not considered amenable to regulatory control through the regulatory instrument in question.
- (j) **Exemption** refers to the determination by the PARC that a source or practice need not be subject to some or all aspects of regulatory control on the basis that the exposure, including potential exposure due to the source or practice is too small to warrant the application of those aspects or that this is the optimum option for protection irrespective of the actual level of the doses or risks;

- (k) **Facilities** refer to nuclear installations or radiation facilities in which people may be exposed to ionizing radiation. These include:
- a. uranium mining and raw material processing facilities such as uranium mines;
  - b. enrichment and fuel manufacturing plants;
  - c. nuclear power plants;
  - d. other reactors such as research reactors and critical assemblies;
  - e. spent fuel reprocessing plants;
  - f. radioactive waste management facilities;
  - g. radiation generator installations and facilities;
  - h. irradiation installations;
  - i. nuclear and radiation facilities for medical, industrial, research and education purposes; and
  - j. such other facilities as the PARC shall determine from time to time;
- (l) **Facility Operators** refer to any organization or person applying for authorization or authorized or responsible for nuclear, radiation, radioactive waste or transport safety when undertaking activities or in relation to any nuclear facilities or sources of ionizing radiation. This includes, inter alia, private individuals, governmental bodies, consignors or carriers, licensees, hospitals, self-employed persons, etc.;
- (m) **Income** refers to the fees and other payments given to the PARC in the conduct of its regulatory functions;
- (n) **Installation Operator** refers to any person authorized to undertake the operation of a nuclear or radiation facility;
- (o) **Ionizing Radiation** refers to electromagnetic or particulate radiation capable of producing ion pairs directly or indirectly;
- (p) **License** refers to a legal document issued by the PARC granting authorization to perform specified activities related to facilities or activities;
- (q) **Licensee** refers to the authorized person who is a holder of a valid license granted for a practice or source who has recognized rights and duties for the practice or source, particularly in relation to protection and safety; or an organization having overall responsibility for facilities or activities;
- (r) **Natural Sources** refer to naturally occurring sources of radiation, such as the sun and stars (sources of cosmic radiation) and rocks and soil (terrestrial sources of radiation);
- (s) **Nuclear Accident** refers to any unintended event, including operating errors, equipment failures and other mishaps, the consequences or potential consequences of which are not negligible from the point of view of protection or safety;

- (t) **Nuclear Damage** refers to loss of life, any personal injury or any loss, or damage to, or loss of use of property, which arises out of or results from the radioactive, toxic, explosive or other hazardous properties, or any combination thereof, of nuclear fuel or radioactive products or any waste in, or of nuclear materials coming from, originating in, or sent to, a nuclear installation or from the ionizing radiation emitted by any other sources of radiation inside a nuclear installation. Personal injury includes any physical or mental injury, sickness or disease, death whether caused directly by a physical trauma or otherwise;
- (u) **Nuclear Incident** refers to any occurrence or series of occurrences having the same origin which causes nuclear damage or, but only with respect to preventive measures, creates a grave and imminent threat of causing such damage;
- (v) **Nuclear Installation** refers to any of the following:
- a. A nuclear power plant;
  - b. a nuclear reactor for research or production of nuclear materials for industrial or medical use, including critical and sub-critical assemblies;
  - c. a plant for preparing or storing fuel for use in a nuclear reactor as described in paragraph (1);
  - d. a nuclear waste storage or disposal facility with an activity that is greater than the activity level prescribed by regulations made for the purposes of this law;
  - e. a facility for production of radioisotopes with an activity that is greater than the activity level prescribed by regulations made for the purposes of law this section; and
  - f. any other facility that is prescribed for the development, production or use of nuclear energy or the production, possession or use of a nuclear substance, prescribed equipment or prescribed information;
- (w) **Nuclear Material** refers to:
- a. nuclear fuel, other than natural uranium and depleted uranium, capable of producing energy by a self-sustaining chain process of nuclear fission outside a nuclear reactor, either alone or in combination with some other materials; and,
  - b. Plutonium except that with isotopic concentration exceeding 80% in plutonium-238; uranium-233; uranium enriched in the isotope 235 or 233; uranium containing the mixture of isotopes as occurring in nature other than in the form of ore or ore residue; any material containing one or more of the foregoing;
- (x) **Nuclear or Radiological Emergency** refers to a non-routine situation that necessitates prompt action primarily to mitigate a hazard due to (a) The energy resulting from a nuclear chain reaction or from the decay of the products of a chain reaction; or (b) Radiation exposure or adverse consequences for human health and safety, quality of life, property or the environment;
- (y) **Nuclear Safety** refers to the achievement of proper operating conditions of nuclear installations, proper handling and use of nuclear material, prevention of accidents or mitigation of consequences of accidents resulting in protection of workers, the public, and the environment from undue radiation hazards;
- (z) **Person** refers to (1) Any individual, organization, corporation, partnership, firm, association, trust, estate, public or private institution, group, political or

administrative entity or other person designated in accordance with national legislation, who or which has responsibility and authority for any action taken under this Act; and (2) any legal successor, representative, agent, or agency of the foregoing. It can also mean any individual who works, whether full time, part time, temporarily, for a licensee and who has recognized rights and duties in the license in relation to occupational radiation protection;

- (aa) **Physical Protection** refers to technical and organizational measures for protection of nuclear material or authorized facilities designed to prevent unauthorized access with nuclear installations, nuclear materials and other radioactive materials;
- (bb) **Practices** refer to activities that introduce additional sources of exposure or exposure pathways or extends exposure to additional people or modifies the network of exposure pathways from existing sources, so as to increase the exposure or the likelihood of exposure of people or the number of people exposed;
- (cc) **Radiation Facility** refers to a facility that utilizes radioactive materials; particle accelerator facility; and other such facility that the PARC shall determine from time to time;
- (dd) **Radiation Generating Equipment or Radiation Generator** refers to an equipment or device that generates ionizing radiation when energized (e.g., x-ray generating equipment) or that would, if assembled or repaired, be capable of producing ionizing radiation when energized as the PARC shall from time to time determine;
- (ee) **Radiation Protection** refers to the protection of people and the environment from the harmful effects of ionizing radiation;
- (ff) **Radiation Source** refers to a radiation generator, or a radioactive source or other radioactive material outside the nuclear fuel cycles of research and power reactors;
- (gg) **Radioactive Material** refers to any material designated in national law or by PARC as being subject to regulatory control because of its radioactivity which includes sealed and unsealed sources and radioactive waste;
- (hh) **Radioactive Source** refers to a radioactive material permanently sealed in a capsule or closely bonded and in a solid form and which is not exempt from regulatory control. This also includes any radioactive material released if the radioactive source is leaking or broken, but does not include material encapsulated for disposal, or nuclear material within the nuclear fuel cycles of research and power reactors;
- (ii) **Radioactive Waste** make refers to waste substances, objects or equipment for which no further use is foreseen by their owner, with a radionuclide content or surface radionuclide contamination exceeding values permitting their discharge into the environment, these values shall be set out in an implementing regulation;
- (jj) **Radioactive Waste Disposal** refers to a permanent emplacement of radioactive waste into areas, facilities or installation without the intention of its retrieval;

- (kk) **Radioactive Waste and Spent Fuel Storage** refers to the holding of radioactive sources, spent fuel or of radioactive waste in a facility that provides for their/its containment, with the intention of retrieval;
- (ll) **Radionuclide** refers to an unstable form of a chemical element that radioactively decays, resulting in the emission of nuclear radiation;
- (mm) **Registrant** refers to the holder of a current registration;
- (nn) **Registration** refers to a form of authorization for practices of low or moderate risks whereby the person responsible for the practice has prepared and submitted a safety assessment of the facilities and equipment to the PARC and has complied with the legal requirements. The requirements for safety assessment and the conditions or limitations applied to the practice should be less severe than those for licensing. Typical practices that are amenable to registration are those for which:
- a. safety can largely be ensured by the design of the facilities and equipment;
  - b. the operating procedures are simple to follow;
  - c. the safety training requirements are minimal; and
  - d. there is a history of few problems with safety in operations;
- (oo) **Regulatory Board** refers to the Philippine Atomic Regulatory Commission;
- (pp) **Safeguards** refer to measures undertaken to ensure that the nuclear material, non-nuclear material, services, equipment, facilities, information, and certain items are not used for the manufacture of nuclear weapons or any other nuclear explosive devices or to further any military purpose;
- (qq) **Safety** refers to the protection of people and the environment against radiation risks, and the safety of facilities and activities that give rise to radiation risks;
- (rr) **Security** refers to the prevention and detection of and response to, theft, sabotage, unauthorized access, illegal transfer or other malicious acts involving nuclear material, other radioactive substances or their associated facilities;
- (ss) **Source** refers to anything that may cause radiation exposure such as by emitting ionizing radiation or by releasing radioactive substances or material and can be treated as a single entity for protection and safety purposes;
- (tt) **Special Drawing Right**, hereinafter referred to as SDR, refers to the unit of account defined by the International Monetary Fund and used by it for its own operations and transactions;
- (uu) **Special Fissionable Materials** refer to Plutonium-239, Uranium-233, Uranium enriched in the isotopes 235 or 233 and materials containing one or more of the foregoing in concentration or amount exceeding values established by the PARC;
- (vv) **Spent Fuel** refers to nuclear fuel that has been irradiated in and permanently removed from a reactor core; and
- (ww) **Technical and Scientific Support Organization** refers to external organization or experts who are not part of the PARC's permanent staff from whom the PARC

may seek advice or recommendations in the conduct of its regulatory responsibilities.

## ARTICLE II

### THE PHILIPPINE ATOMIC REGULATORY COMMISSION

**SECTION 6.** *Creation and Mandate of the Philippine Atomic Regulatory Commission (PARC).* – There is hereby created an independent central nuclear regulatory body to be known as the Philippine Atomic Regulatory Commission (PARC) which shall exercise authority over all aspects of safety, security, and safeguards involving nuclear materials and other radioactive materials, facilities and radiation generating equipment.

**SECTION 7.** *Regulatory Policy.* – In issuing authorizations and other regulations under this Act, the PARC shall:

- (a) Impose the minimum requirements to protect the health and safety of the public and the environment, and ensure the security of ionizing radiation sources;
- (b) Prevent the spread of nuclear weapons and prevent nuclear or radiological terrorism consistent with the obligations of the Philippines under relevant international instruments;
- (c) Establish and implement regulations, rules and orders consistent with relevant international standards and best practices; and
- (d) Ensure that facility operators are technically and financially qualified to engage in the proposed activities in accordance with the requirements of this Act and the PARC's regulations, and has financial protection to fulfill obligations on liability for nuclear and radiation damage.

**SECTION 8.** *Functions of the PARC.* – The PARC shall:

- (a) Define, formulate, develop and issue policies, regulations, orders and rules, standards, regulatory guides, and other issuances necessary for the implementation of this Act and its implementing rules and regulations;
- (b) Issue, amend, and revoke rules, regulations and orders pertaining to the financial capability of facility operators to cover liability for nuclear damage;
- (c) Establish and implement a system of authorization in the form of notification, registration, and licensing, including modifications, amendments, suspension, and revocation of such authorizations;
- (d) Review and assess submissions on safety assessments and security plans from the facility operators prior to authorization and periodically thereafter, as required;
- (e) Inspect, monitor, and assess activities and practices ensure compliance with applicable regulations, and the terms and conditions of authorizations;
- (f) Take enforcement measures as provided for under Section 21 of this Act in the event of non-compliance with applicable regulations or the terms and conditions of authorizations;
- (g) Define exemptions and exclusions from regulatory control;

- (h) Ensure the application of safety, safeguard and security requirements consistent with national and international commitments;
- (i) Hold hearings and conduct investigations, and for these purposes, administer oaths and affirmations and issue subpoenas to any person to appear and testify, or to appear and produce documents at any designated time and place;
- (j) Cooperate with and act as the national competent authority on nuclear safety, security and regulatory matters for the International Atomic Energy Agency (IAEA), foreign governments, ministries, departments, and agencies, relevant regional and international organizations, including law enforcement and intelligence agencies;
- (k) Participate in relevant regional and international conferences/meetings/workshops/seminars/trainings related to safety, security, and safeguards of nuclear and other radioactive materials and safety of radiation generating equipment;
- (l) Obtain experts' advice and opinions necessary to perform its functions, including the hiring of consultants, contracting of specific projects, or establishing Technical and Scientific Support Organizations (TSOs) or ad hoc advisory bodies;
- (m) Conduct or contract out research activities on radiation safety and security;
- (n) Establish appropriate mechanisms and procedures for informing and consulting the public and other stakeholders about the regulatory process and the safety, health, and environmental aspects of regulated activities and practices, including in incidents, accidents, and abnormal occurrences;
- (o) Establish and maintain a national register of radiation sources
- (p) Establish and maintain a national register of persons authorized to carry out activities or practices under this law;
- (q) Cooperate with the IAEA in the application of safeguards in accordance with the Safeguards Agreement, and any protocols thereto, between the Republic of the Philippines and the IAEA, including conducting inspections and visits, carrying out complementary access and providing any assistance or information required by designated IAEA inspectors in the fulfillment of their responsibilities;
- (r) Establish and maintain a State System of Accounting for and Control of nuclear material and a national system for the registration of licenses for nuclear material, and to establish the necessary reporting and record keeping and requirements pursuant to the Safeguards Agreement, and any protocols thereto, between a State and the IAEA; and
- (s) Perform such other relevant functions necessary to implement the provisions of this Act.

Nothing in this Act shall preclude the authorized agents of the Department of National Defense and other law enforcement agencies to conduct inspections of atomic energy facilities, and materials or any activities jointly with the authorized representatives of the PARC when the national security of the State is involved.

**SECTION 9. *Management System.*** – The PARC shall establish, implement, and assess a management system that is aligned with its safety goals and contributes to its achievement. The PARC shall ensure that regulatory control is stable and consistent.

**SECTION 10. *Organizational Structure of the PARC.*** – The PARC shall be headed by a Commissioner who shall be appointed by the President for a term of five (5) years with a rank equivalent to an Undersecretary. The Commissioner shall be assisted by four (4) Deputy Commissioner who shall be appointed by the President with a rank equivalent to Assistant Secretary with a term of five (5), four (4), three (3) and two years, respectively. Thereafter, the successors shall be appointed for five (5) years. The four (4) deputy Commissioners shall represent the following sectors: (a) health, (b) energy, (c) defense and security, and (d) industry which shall include research, industry, agriculture, and environment. The Deputy Commissioners may come from any of the aforesaid sectors.

The Commissioner or at least one (1) of the four (4) Deputy Commissioners shall have the necessary scientific and technical qualifications, preferably an advanced degree in natural sciences or engineering or a broad professional background in any of the said fields.

The members of the PARC shall not be removed from office except for just cause as may be provided by law.

For the proper management and effective implementation of the objectives of the PARC, an Executive Director shall be appointed by the President upon the recommendation of the PARC, and shall perform the following functions:

- (a) Assist the Commissioner in the discharge of the executive and administrative functions;
- (b) Coordinate and direct the activities of the staff and be responsible for the day-to-day management of the affairs and activities of the PARC;
- (c) Recommend and develop plans to achieve the PARC's objectives;
- (d) Provide secretariat services to the PARC; and
- (e) Perform such other relevant functions necessary to implement the provisions of this Act.

All other officials and employees of PARC shall be appointed by the Commissioner subject to the civil service laws, rules, and regulations.

**SECTION 11. *Official Site of PARC.*** – A land area equivalent to at least ten (10) hectares out of the area of lands which are under the administration of the Bases Conversion and Development Authority (BCDA) within the Clark Special Economic Zone in Pampanga and Tarlac, shall be allocated exclusively for the PARC office: Provided, That the PARC shall establish additional offices in strategic areas as it may deem necessary: Provided further, That the boundaries and technical descriptions of these land areas shall be determined by an actual and joint group survey.

**SECTION 12. *Use of Income.*** – The budget of the PARC, based on an annual appropriation from Congress, shall ensure that the PARC has the financial and human resources necessary to fulfill its assigned responsibilities under this Act.

The PARC shall also be authorized to:

- (a) Charge and collect reasonable fees in the performance of its regulatory functions; Provided, that such fees shall be imposed by regulation on the basis of such published criteria as the PARC deems appropriate and in compliance with existing rules and regulations; and
- (b) Use of its income, donations, bequests, grants, and all sums which may be appropriated for upgrading its physical and human resources, with due consideration to the PARC's independence and impartiality for the conduct of its activities, and for augmentation of its budget in case of shortfalls. The PARC, as an independent and impartial PARC may also solicit, receive and retain donations, bequests, and grants.

**SECTION 13. *Nuclear Waste Management Fund.*** – In view of the great importance of nuclear waste disposal and spent fuel, a portion of the payment of the electricity generated from the use of nuclear energy shall be set aside to establish a Nuclear Waste Management Fund. The Fund shall be held in escrow and can only be utilized for the decommissioning of nuclear facilities and for the safe disposal of the nuclear waste, which includes siting research, transports, and final geological disposal. The portion of the payment shall be determined by the PARC comparable to international practice.

**SECTION 14. *Technical and Scientific Support Organizations.*** – The PARC is authorized to seek expert opinion and recommendations from independent technical and scientific support organizations whose technical advice does not have any conflict of interest or improper influence on its regulatory decision making. Any advice offered shall not relieve the PARC of its responsibilities under this Act, other relevant laws, and applicable regulations.

**SECTION 15. *Establishment of an Advisory Board.*** – There shall be established an advisory board to assist and advise the Commissioners on the safety and security matters arising from the use of nuclear and radioactive materials and from the operation of nuclear installations and radiation facilities, and on regulations applicable to such authorizations. The advisory board, not exceeding thirteen (13) members, shall be composed of the following:

- (a) Secretary of the Department of Science and Technology, as Chairperson;
- (b) Secretary of Department of Health, as Vice Chairperson;
- (c) Secretary of the Department of Energy, as Member;
- (d) Secretary of Department of Environment and Natural Resources, as Member;
- (e) Secretary of Department of National Defense, as Member;
- (f) Secretary of Department of Trade and Industry, as Member;
- (g) Secretary of the Department of Agriculture, as Member;
- (h) Secretary of Department of Labor and Employment; and,
- (i) Five (5) experts from the academe and related industry and/or professional associations.

The advice of the Board shall not be disregarded by the PARC in its decisions or resolutions: Provided, however, That the PARC shall have the final decision and shall be ultimately accountable to their decisions and actions.

The Advisory Board may be convened anytime by any of its Chairpersons, or upon the request of the PARC.

### **ARTICLE III**

#### **REGULATION AND AUTHORIZATION OF NUCLEAR INSTALLATIONS AND RADIATION FACILITIES**

##### **SECTION 16. *Requirement for Authorization.*** –

- (a) Any person who intends to engage in activities or practices shall submit application to the PARC of its intention to carry out such activities or practices in the form and within the time limits required by the PARC.
- (b) No authorization to acquire, own, or operate any nuclear installations and radiation facilities shall be issued to an alien, or any corporation or other entity which is owned or controlled by an alien, a foreign corporation, or a foreign government. For purposes of this Act, a corporation or entity is not owned or controlled by an alien, a foreign corporation of a foreign government unless at least sixty percent (60%) of its capital stock is owned by Filipino citizens.

**SECTION 17. *Activities Subject to Authorization.*** – It shall be unlawful for any person to transfer, construct, receive, own, possess, operate, import, or export any nuclear installations and radiation facilities except under an authorization issued by the PARC under this Act. A person or organization shall be required specific authorization issued by the PARC under this Act to conduct any of the following activities:

- (a) Transfer, receive, acquire, own, possess, or use nuclear or radioactive material for medical, industrial, agricultural, energy production and research applications;
- (b) Manufacture and distribute of radioactive materials or products containing radioactive materials to other licensees or persons exempt from the requirements for a license;
- (c) Produce radioactive materials from particle accelerators;
- (d) Use of ionizing radiation devices in medicine, dentistry, veterinary medicine, commerce and industry, education and training, research, anti- crime, security, household activities and all other facilities/establishments;
- (e) Site, construct, commission, operate, dismantle, decommissioning, and closure of nuclear installations;
- (f) Transport nuclear or radioactive materials to, within, and from the Philippines; and,
- (g) Engage in or provide nuclear technical services.

**SECTION 18. *Licensing Process and Conditions for Issuance of Authorization.*** – The PARC shall provide for the licensing process and the conditions for issuance of

authorization specified in the Implementing Rules and Regulations (IRR) issued under this Act.

**SECTION 19. *Responsibilities of the Authorized Person.*** –

- (a) Any person authorized to conduct activities or practices shall have the primary responsibility for the safe and secure conduct of those activities or practices and for ensuring compliance with this Act and all applicable regulatory requirements and conditions of the authorization related to those activities or practices.
- (b) Any person authorized to conduct activities or practices shall provide the PARC with any requested assistance in the performance of its regulatory functions.
- (c) Any person ceasing authorized activities or practices shall inform the PARC prior to the cessation of those activities or practices.

**SECTION 20. *Provisional Authorization.*** – In all cases of application for authorization to construct a facility, if the PARC finds that, on the basis of the technical information and data so far made available to it, there is reasonable assurance that the proposed facility can be constructed and operated at the proposed location without undue risk to the health, safety, and security of the public and the environment, the PARC shall initially issue a provisional license to the applicant. Such a provisional authorization may be granted even if the information on health, safety, and security then available is less than would be needed for an authorization to operate provided that the PARC is satisfied that there is reasonable assurance that questions of health, safety, and security will be so resolved as to warrant the issuance of an authorization to operate the facility. The provisional authorization provided herein shall not exceed one (1) year.

**SECTION 21. *Inspections and Enforcement.*** –

- (a) The PARC shall implement a system of inspection of nuclear and radiation facilities and transport, through regulations issued under this Act, to verify compliance with the applicable requirements and conditions of any authorization issued under Section 16.
- (b) The PARC shall implement a system of verification of the safety and security of nuclear and other radioactive material through safety and security assessments; monitoring and verification of compliance with any authorization issued under Section 16; inspections; and the maintenance of appropriate records by licensees. The verification system shall be provided for in the regulations issued under this Act.
- (c) Where the PARC has established that any person has committed a violation of relevant nuclear safety, security and safeguards regulations issued under this Act, the conditions of an authorization issued under Section 18, or other requirements that do not constitute a criminal offense under Sections 59 and 60 of this Act, the PARC may impose by order any of the following penalties in conformity with the proceedings provided for in Section 23: suspension, modification, and revocation of authorization, or imposition of a civil monetary penalty.

**SECTION 22. *Additional Requirements in Case of Nuclear Installation for Commercial Power. Exemptions.*** – Nothing in this Act shall be construed to exempt the operator of a nuclear facility designed primarily for the generation of electricity for commercial purposes, from complying with other requirements provided by existing laws,

such as securing a franchise, a certificate of public convenience and necessity, obtaining approval for rates and services and others, from the appropriate agency having jurisdiction: Provided, however, that upon certification by the Commission, importations of nuclear fuel for use in these facilities shall be free from all taxes and duties in accordance with incentives under the pertinent provisions of RA 5186, Investment Incentives Act.

**SECTION 23.** *Suspension, Modification, and Revocation of Authorization.* – Any authorization issued pursuant to this Act may be suspended, modified or revoked by the PARC in the event of a willful violation of its conditions, when circumstances in which the public interest, health, safety, or security so requires, when the conditions under which it was issued are no longer complied with, or in any circumstance that continued activities under the authorization shall pose an unacceptable risk to people or the environment: Provided, that the licensee shall have been accorded an opportunity to demonstrate or achieve compliance with the requirements. In all instances, the PARC shall provide information to the public on the procedures and requirement for suspension, modification, renewal, revocation, or relinquishment of authorizations.

No authorization shall be transferred, assigned, encumbered, or in any manner disposed of, either voluntarily, or involuntarily, directly or indirectly, unless the PARC shall, after securing full information, find that such transfer, assignment, encumbrance, or other disposition is in accordance with the purposes and provisions of this Act and shall give its consent in writing.

Upon the suspension, revocation, or expiration of an authorization which is not renewed, and pursuant to PARC order, the licensee shall be required to take such measures as may be necessary to protect the health and safety of the public — and the environment from the harmful effects of radiation and ensure security of radioactive material and facilities.

Whenever practicable, the PARC may take temporary custody of any nuclear and other radioactive material and facilities held by the licensee pending their appropriate and lawful disposition by or for the licensee.

## **ARTICLE IV**

### **RADIATION PROTECTION**

**SECTION 24.** *Regulation to Ensure Radiation Safety.* –

(a) The PARC shall take the appropriate steps to ensure that:

1. No activities or practices shall be authorized unless it produces sufficient benefit to the exposed person or to the society in a manner that offsets the radiation harm that it may cause;
2. The magnitude of individual doses, the number of persons exposed, and the likelihood of incurring exposures shall all be kept as low as reasonably achievable, economic, and social factors being taken into account; and
3. No individual shall be exposed to ionizing radiation doses which exceed prescribed national dose limits;

(b) The PARC shall establish dose limits for persons that may not be exceeded in conducting activities under regulatory control;

- (c) The PARC shall identify sources or practices to be exempted from regulatory control;
- (d) The PARC shall establish clearance levels below which radioactive material within authorized activities and practices can be released from regulatory control;
- (e) The PARC shall maintain a national system for registration of licensees, registrants, imported and exported selected items, and ionizing radiation sources;
- (f) The PARC shall ensure that authorized facilities maintain a record of exposure of the public, patients, and of workers occupationally exposed to ionizing radiation at their work; and,
- (g) The PARC shall promulgate appropriate regulations, rules, orders and related guidelines to address all issues and concerns related to exposure to ionizing radiation from natural sources.

**SECTION 25.** *Responsibilities of Authorized Persons in Radiation Protection.* –

- a) The authorized person shall bear the prime responsibility for ensuring the safety and security of the facility and of all activities and practices associated with it;
- b) Authorized persons shall ensure compliance with the requirements and dose limits established by the PARC and shall ensure that radiation doses to workers and the public, including doses from releases to the environment, are as low as reasonably achievable, taking into account social and economic factors;
- c) Persons authorized to conduct activities utilizing ionizing radiation for medical purposes shall ensure the overall patient protection and safety in the prescription of, and during the delivery of, medical exposures.

**ARTICLE V**

**EMERGENCY PREPAREDNESS AND RESPONSE**

**SECTION 26.** *Emergency Plan.* – No authorization or license to conduct activities or practices, operate a facility or possess or use a source may be granted unless and until an appropriate emergency preparedness and response plan has been developed by the applicant and approved by the PARC.

**SECTION 27.** *Emergency Preparedness and Response.* – The PARC shall:

- (a) Develop and maintain a national emergency plan for responding to potential nuclear or radiological emergencies;
- (b) Coordinate the task of the radiological emergency response organization of the PARC within the framework of the National Disaster Risk Reduction and Management Council (NDRRMC) of the Department of National Defense in the event of a nuclear and radiological emergency;
- (c) Provide for the activities of an emergency response center and for an international exchange of information on the radiation situation, consistent with the Philippines' obligations under the Convention on Early Notification of a Nuclear Accident and the Convention on Mutual Assistance in the Case of a Nuclear Accident or Radiological Emergency; and,

(d) Define the radiation levels at which evacuation should be considered.

## ARTICLE VI

### TRANSPORT OF NUCLEAR AND OTHER RADIOACTIVE MATERIAL

**SECTION 28.** *Regulation in the Transport of Nuclear and Other Radioactive Material.*

– The PARC shall establish and implement safety and security requirements for the transport of nuclear and other radioactive material to, from and within the jurisdiction of the Philippines consistent with the International Atomic Energy Agency (IAEA) regulations for the safe and secure transport of radioactive material.

**SECTION. 29.** *Requirements for Authorization.* – No person shall engage in the transport of radioactive material without an authorization issued by the PARC.

## ARTICLE VII

### IMPORT AND EXPORT OF NUCLEAR AND OTHER RADIOACTIVE MATERIALS

**SECTION 30.** *Export or Import Control.* – The PARC shall establish regulatory requirements and relevant guides for the exportation and importation of nuclear and other radioactive materials which require licensees, inter alia:

- (a) To secure an authorization from the PARC prior to export or import with the assurance of applying safeguards and physical protection measures to protect public health, safety and security;
- (b) To ensure before import that the exporter has an authorization from the competent authority of the exporting country to export such materials to the Philippines in accordance with laws and regulations of that country; and
- (c) To ensure before export that the importing country has the appropriate technical and administrative capability, resources and regulatory infrastructure needed for the safe and secure management of the requested nuclear and other radioactive material, particularly disused sources.

## ARTICLE VIII

### MANAGEMENT OF SPENT NUCLEAR FUEL AND OTHER RADIOACTIVE WASTE

**SECTION 31.** *Regulation of Radioactive Waste and Spent Nuclear Fuel Management.* – To ensure the safe and secure management of radioactive waste and spent fuel, the PARC shall establish:

- (a) Applicable safety and security requirements and regulations for the protection of people and the environment from adverse impacts of radioactive waste and spent fuel management activities;
- (b) A system of authorization of radioactive waste and spent fuel management activities;
- (c) A system of regulatory inspection, documentation, and reporting for radioactive waste and spent fuel management activities, and in the case of disposal, a system of institutional control; and,

- (d) A system of enforcement to ensure compliance with applicable regulations and the terms and conditions of authorizations for radioactive waste and spent fuel management activities.

## **ARTICLE IX**

### **NUCLEAR SAFETY AND DECOMMISSIONING**

#### **SECTION 32. *Nuclear Safety.*** –

- (a) Any person who intends to construct or operate a nuclear installation or to conduct related activities shall obtain an authorization from PARC consistent with the terms of this Act and applicable regulations.
- (b) The PARC shall establish requirements for the regulatory control of nuclear installations to include the following:
1. Regulations for siting, design, construction, commissioning, operation maintenance and decommissioning;
  2. Regulations for public information, management system and authorization of installation operators;
  3. Assessment and verification of safety and security by the facility operator and by PARC;
  4. Financial and human resources necessary to ensure safety and security; and,
  5. Human factors to be taken into account by the facility operator during the lifetime of the nuclear installation;

**SECTION 33. *Responsibility of Authorized Person for Nuclear Safety.*** – The authorized person shall bear the prime responsibility for ensuring nuclear safety and security of nuclear installation and of all activities and practices associated with it.

#### **SECTION 34. *Decommissioning of Nuclear Installation.*** –

- (a) The PARC shall establish requirement for the decommissioning of nuclear installations, including:
1. Safety and environmental criteria, including conditions on the end state of the decommissioning;
  2. Limits and conditions for the removal of regulatory control for nuclear installations containing radionuclides;
  3. Regulations for the clearance of radioactive material during and following decommissioning.
- (b) The PARC shall ensure that relevant documents and records prepared by the facility operator are maintained for a specified period of time before, during and after decommissioning.

**SECTION 35. Decommissioning Plan. –**

- (a) At the design stage of a nuclear installation, the applicant for authorization to construct and operate a nuclear installation shall prepare an initial decommissioning plan for approval by the PARC. The plan shall be commensurate with the type and status of the nuclear installation and the hazard that may be associated with the decommissioning.
- (b) The PARC shall require the facility operator to provide periodic reviews and updates of the decommissioning plan and shall specify the maximum time intervals between such reviews and updates.

**ARTICLE X**

**SAFEGUARDS, PHYSICAL PROTECTION, AND SECURITY**

**SECTION 36. Safeguards. –** The PARC shall:

- (a) Maintain a system of accounting for and control of nuclear materials and establish requirements for accounting for and methods for control of nuclear material;
- (b) Fulfill the Philippines' obligation to the Non-Proliferation Treaty, the Safeguards Agreement, and related international treaties, conventions, agreements and protocols thereto;
- (c) Ensure unimpeded access by designated IAEA inspectors and duly authorized representatives of the Philippine government agencies to any location or facility provided for under the Safeguards Agreement and any protocols thereto, with a view to conducting the verification activities authorized by these instruments; and,
- (d) Ensure full cooperation and support to the IAEA by all national government agencies and authorized persons in the application of safeguards measures.

**SECTION 37. Physical Protection and Security of Nuclear and Other Radioactive Material. –** The PARC:

- (a) Have the authority to issue regulations, rules and orders under this Act to implement effective measures to prevent, detect, and respond to unauthorized acts involving nuclear and other radioactive material that may cause injury to persons, property or the environment in the Republic of the Philippines or otherwise jeopardize national security;
- (b) Establish requirements under the regulations issued under this Act for the physical protection of nuclear material, and shall fulfill the Republic of the Philippines' obligations as a party to the Convention on the Physical Protection of Nuclear Material, the Amendment thereto, and other international treaties and conventions;
- (c) Have the authority under this Act to issue regulations, rules and orders for the protection of individuals, society and the environment from the deleterious effects of radioactive sources;
- (d) Have the authority under this Act to coordinate with the relevant agencies of government and seek international cooperation to effectively implement these security measures.

## ARTICLE XI

### ADMINISTRATIVE PROCEDURE AND JUDICIAL REVIEW

**SECTION 38. *Notice and Conduct of Hearing.*** – In any proceeding under this Act for the grant, suspension, revocation or amendment of any authorization, or upon the issuance of an order, the PARC shall hold a hearing upon the request of any person whose interest may be affected and shall admit such person as a party to the proceeding.

The hearings of the PARC may be open to the public and relevant stakeholders, except where warranted by considerations of security, national defense or proprietary manners.

Except in cases where immediate action is required in order to protect the health and safety of the public or the national interest, no order issued under Section 23 shall become elective until after the licensee has had notice for a hearing and opportunity to be heard.

Where an order suspending, revoking, or modifying an authorization or an order issued under Section 23 is made elective without prior notice for a hearing and opportunity to be heard, the order shall only be temporary pending the hearing and issuance of the PARC's final decision in the proceeding.

**SECTION 39. *Orders and Decisions.*** – All orders and decisions of the PARC shall be in writing, stating clearly and distinctly the facts and issues involved and the reasons on which the PARC's order or decision is based, and shall be made available to the public.

**SECTION 40. *Judicial Review.*** – The Court of Appeals is hereby given the power of judicial review over any final order or decision of the PARC rendered under Section 34 and shall modify or set aside such order or decision when it clearly appears that there was no evidence before the PARC to support reasonably such order or decision, or that the same is contrary to law. Any such final decision or order may be reviewed by the Court of Appeals on the application of any party or other person affected thereby, by *certiorari* in appropriate cases, or by petition for review, in accordance with the Rules of Court, within such period as the PARC may rule or prescribe but not exceeding thirty (30) days from notice of such order or decision. An appeal shall not suspend the grant of authorization but shall maintain the suspension or revocation of authorization until after the final disposition of the appeal by the Court of Appeals, unless said Court determines otherwise. Only questions of law on such order or decision may be reviewed by the Supreme Court.

**SECTION 41. *Notice of Reputation.*** – No regulation adopted by the PARC shall be effective less than fifteen (15) days after publication of the regulation in any newspaper of general circulation, except, that if the PARC finds that the health, safety, and security or the national interest requires, the regulation may be made effective immediately upon publication in the Official Gazette, or in a newspaper of general circulation or upon furnishing copies of the regulation to the persons affected.

**SECTION 42. *Incident Reports.*** – No report by any licensee of any incident arising out of or in connection with authorized activities made pursuant to any requirement of the PARC shall be admitted as evidence in any suit or action for damages growing out of any matter mentioned in such report.

## ARTICLE XII

### CIVIL LIABILITY FOR NUCLEAR AND RADIATION DAMAGE

**SECTION 43.** *The Operator Liability.* – The operator shall be liable for nuclear damage upon proof that such damage has been caused by a nuclear incident:

- (a) In the operator's nuclear installation;
- (b) Involving nuclear material coming from or originating in the operator's nuclear installation, and occurring:
  - 1. Before liability with regard to nuclear incidents involving the nuclear material has been assumed, pursuant to the express terms of a contract in writing, by another installation operator;
  - 2. In the absence of such express terms, before another installation operator has taken charge of the nuclear material.
- (c) Involving nuclear material sent to the operator's nuclear installation, and occurring:
  - 1. After liability with regard to nuclear incidents involving the nuclear material has been assumed by him, pursuant to the express terms of a contract in writing, from another installation operator; or
  - 2. In the absence of such express terms, after the operator has taken charge of the nuclear material: Provided, that if nuclear damage is caused by a nuclear incident occurring in a nuclear installation and involving nuclear material stored therein incidentally to the carriage of such material, the provisions of paragraph (a) of this Section shall not apply where another installation operator or person is solely liable pursuant to the provisions of paragraph (b) or (c) of this Section.
- (d) Any provision in this Section to the contrary notwithstanding, the installation operator shall be liable for nuclear damage upon proof that such damage has been caused by a nuclear accident involving nuclear material in the course of carriage:
  - 1. To a nuclear installation located in the territory of a state not party to an international convention on civil liability for nuclear damage to which the Philippines is a party; or
  - 2. To international transport between the Philippines and an operator in another Contracting Party to the Vienna Convention.
- (e) For the purpose of this Act, whenever both nuclear damage and damage other than nuclear damage have been caused by a nuclear incident or jointly by a nuclear incident and one or more other occurrences, such other damage shall, to the extent that it is not reasonably separable from the nuclear damage be deemed to be nuclear damage caused by that nuclear incident. Where, however, damage is caused jointly by nuclear incident covered by this Section and by an emission of ionizing radiation not covered by it, nothing in this Section shall limit or otherwise affect the liability, either as regards any persons suffering nuclear

damage or by way of recourse or contribution, of any person who may be held liable in connection with that emission of ionizing radiation.

**SECTION 44. *Absolute and Exclusive Liability.*** –

- (a) The liability of the installation operator for nuclear damage shall be absolute;
- (b) The installation operator shall not be liable for nuclear damage caused by a nuclear incident directly due to a grave natural disaster of an exceptional character; and,
- (c) Except as otherwise provided in this Act, no person other than the installation operator shall be liable for nuclear damage.

**SECTION 45. *Recourse Actions.*** – The installation operator shall have a right of recourse only:

- (a) If there is such a right pursuant to the express provision of a written contract with the other installation operator; or,
- (b) If the nuclear incident results from an act or omission done with intent to cause damage, against the individual who has acted or omitted to act with such intent.

**SECTION 46. *Gross Negligence or Intentional Act of Claimant.*** – If the nuclear damage resulted wholly or partly either from the gross negligence of the person suffering the damage or from an act or omission of such person done with intent to cause damage, the Court may relieve the installation operator from the obligation to pay compensation in respect of the damage suffered by such person.

**SECTION 47. *Exceptions to Liability.*** – An installation operator shall not be liable for any nuclear damage caused by a nuclear accident directly due to an act of armed conflict, hostilities, civil war or insurrection.

**SECTION 48. *Limit of Liability.*** – The liability of the installation operator for nuclear damage under this Act shall be limited to an amount in Philippine pesos which is equivalent to 300 million Special Drawing Rights (SDRs) or roughly equivalent to 400 million US dollars, for any one nuclear incident, exclusive of interest or costs which may be awarded by the Court in actions for compensation of such nuclear damage. The amount may be subject to change, as determined by the PARC, in accordance with international conventions ratified by the Philippines.

**SECTION 49. *Exemption from Liability.*** – The installation operator shall not be liable under this Act for nuclear damage:

- (a) To the nuclear installation itself or to any property on the site of that installation which is used or to be used in connection with that installation; or
- (b) To the means of transport upon which the nuclear material involved was located at the time of the nuclear incident.

**SECTION 50. *Exclusions.*** – The PARC may, if it determines that the small extent of the risk involved so warrants, exclude by regulation any small quantities of nuclear material from the application of the provisions in this Article XI: Provided, that (a) maximum limits for the exclusion of such quantities have been established by the Board of Governors of the

International Atomic Energy Agency; and (b) any exclusion must be within the limits so established.

**SECTION 51. *Certificate to Carrier.*** – In accordance with such regulations as the PARC may issue, the appropriate installation operator shall provide the carrier, which furnishes carriage of nuclear material, with a certificate issued by or on behalf of the insurer or other financial guarantor furnishing the financial security.

**SECTION. 52. *Liability of Several Installation Operators.*** – Where nuclear damage engages the liability of more than one installation operator, the following rules shall apply:

- (a) In so far as damages attributable to each installation operator are not reasonably separable, the installation operators involved shall be jointly and severally liable;
- (b) In case the nuclear incident occurs in the course of carriage of nuclear material, either in one and the same means of transport, or, in the case of storage incidental to the carriage, in one and the same nuclear installation and causes nuclear damage which engages the liability of more than one installation operator, the total liability shall not exceed the highest amount applicable with respect to any one of them pursuant to Section 43 of this Act; and
- (c) In neither of the cases referred to in paragraphs (a) and (b) of this Section shall the liability of any one installation operator exceed the amount established in Section 44 hereof.

**SECTION 53. *Operator of Several Installations.*** – Subject to the provisions of Section 47, where several nuclear installations of one and the same installation operator are involved in one nuclear incident, such installation operator shall be liable in respect of each nuclear installation involved up to the amount applicable pursuant to Section 43.

**SECTION 54. *Carrier or Handler of Nuclear Material as Installation Operator.*** – The PARC, subject to such terms and conditions as it may by regulation or order prescribe, designate a carrier of nuclear material or a person handling radioactive waste, upon the carrier's request and with the consent of the installation operator concerned, as installation operator in the place of the installation operator in respect of such nuclear material or radioactive waste respectively. Upon such designation, such carrier or such person shall be considered as an installation operator for the purpose of this Section.

**SECTION 55. *Court Having Jurisdiction.*** – The Regional Trial Court having jurisdiction over the place where the nuclear incident occurs shall have jurisdiction to determine claims for compensation for such nuclear damage under this Act.

**SECTION 56. *Intervention of PARC in Court Proceedings.*** – When, after the occurrence of a nuclear incident, it appears that the Government will have to pay indemnity, the Court having jurisdiction over the claims for compensation arising from the nuclear incident, shall allow the PARC, upon its petition, to intervene in the proceedings with respect to technical issues, at any time before final judgment.

**SECTION 57. *Compulsory Processes.*** – After the occurrence of a nuclear incident for which it appears compensation may be payable under this Act, the PARC may adopt such measures as may be appropriate to determine the persons who were or might have been exposed to ionizing radiation resulting from such nuclear incident, which measures may include a summons to such persons to submit themselves to examination before such authority or body as shall be designated by the PARC within three (3) months from the date of summons. In determining the amount of damages or the right to recover damages, the

Court may, in its discretion, take into account the inexcusable failure of the claimant to fulfill or comply with the foregoing obligation.

**SECTION 58.** *Investigation of Nuclear incidents.* – The PARC shall make an investigation of the cause and extent of any nuclear incident for which it appears compensation may be payable under this Act and its finding shall be made available to the public, to the parties involved and to the Courts.

## **ARTICLE XIII**

### **TRANSITORY PROVISIONS**

**SECTION 59.** *The Philippine Nuclear Research Institute.* –

- (a) The regulatory function of the Philippine Nuclear Research Institute (PNRI) is hereby transferred to the PARC;
- (b) The development, promotion and use of nuclear energy for peaceful applications shall remain the responsibility of the Institute, whereupon the Director of the Institute shall, in coordination with the Department of Budget and Management (DBM), draw up its new organizational structure in accordance with the Civil Service Law, rules and regulations;
- (c) The PNRI shall be the scientific nuclear organization in the country and continue to function as one of the Research and Development Institutes of the Department of Science and Technology and continue its mandate to foster nuclear research and development including nuclear safety research pursuant to the objectives of Executive Order No. 128, series of 1987;
- (d) Under this Act, the PNRI shall be allowed to use 100% of its income to augment and hire additional human resources and upgrade its facilities;
- (e) The regulatory functions of the PNRI which were inherited from the former Philippine Atomic Energy Commission (PAEC) by virtue of Republic Act No. 2067, as amended by R.A. 3589 and Republic Act No. 5207, as amended by P.D. 1484, Executive Order No.128 and Executive Order No.366 are deemed transferred to the PARC; and,
- (f) All regulatory issuances such as regulations, rules, orders previously established by the PNR shall remain in force until superseded by the PARC.

**SECTION 60.** *The Center for Device Regulation, Radiation, Health, and Research.*

- (a) The regulatory functions of the Center for Device Regulation, Radiation, Health and Research (CDRRHR) of the Department of Health (DOH) over devices generating ionizing radiation by virtue of Republic Act No. 9711 otherwise known as “The Food and Drug Administration Act of 2009”, are deemed transferred to the PARC;
- (b) The administrative supervision of the CDRRHR shall remain with the DOH; and,
- (c) All regulations, rules, orders pertaining to ionizing radiation previously established by the CDRRHR shall remain in force until superseded by the PARC.

**SECTION 61. *Human Resources.*** – All plantilla positions of the Nuclear Regulatory Division of the PNRI-DOST are hereby transferred to the PARC. Thereafter, all powers, functions and duties, records, files, and assets pertaining to regulation of nuclear and radioactive materials and facilities of the PNRI shall be transferred to the PARC. All plantilla positions of the Radiation Regulation Division of the Center for Device Regulation, Radiation, Health and Research (CDRRHR) of the DOH which have responsibilities solely in ionizing radiation regulation are also hereby transferred to the PARC. Thereafter, all powers, functions and duties, records, files, and assets of these organizational units shall be transferred to the PARC.

The Government Reorganization Act or Republic Act No. 6656 shall govern the reorganization of the affected personnel of the Nuclear Regulatory Division of PNRI and the Radiation Regulation Division of the CDRRHR.

There shall be no diminution of rank, salaries, allowances, and benefits of all personnel transferred to the PARC. In case of a difference in the above benefits between the transferred employees of the two agencies, the higher amount shall be adopted. New employees of the PARC shall be entitled to the same allowances and benefits as the transferred employees.

The PARC shall draw up its organizational structure with the necessary qualification requirements and standards in accordance with the Civil Service Law, rules and regulations for evaluation and approval of the DBM upon submission to the DBM.

**SECTION 62. *Magna Carta for Science and Technology Personnel.*** – Qualified employees of the PARC and its attached units shall be covered by Republic Act No. 8439, known as the Magna Carta for Scientists, Engineers, Researchers and other science and technology personnel in the government.

**SECTION 63. *Signed Conventions.*** – To take cognizant on the pending conventions signed by the Philippine Government such as the Amendment to the Convention on Physical Protection of Nuclear Materials, International Convention on the Suppression of Acts of Nuclear Terrorism, Convention on Nuclear Safety and Joint Convention on the Safety of Spent Fuel Management and on the Safety of Radioactive Waste Management.

## **ARTICLE XIV**

### **PENAL PROVISIONS**

**SECTION 64. *Violation of Specific Provisions of the Act.*** – Any person who willfully violates, attempts to violate, or conspires to violate, any provision of Section 17 of this Act shall upon conviction thereof, suffer the penalty of imprisonment of not more than five (5) years or a fine ranging from one million pesos (PHP 1,000,000.00) to five million pesos (PHP 5,000,000.00) or both.

**SECTION 65. *Violation of Other Provisions of this Act.*** – Any person who shall willfully violate, attempt to violate, or conspire to violate any provisions of this Act for which no penalty is specifically provided or of any regulation, order or authorization issued under this Act shall, upon conviction thereof, suffer the penalty of imprisonment of not more than two (2) years or a fine of not more than five hundred thousand pesos (PHP 500,000.00) or both.

## ARTICLE XV

### FINAL PROVISIONS

**SECTION 66.** *Appropriations.* – The amount necessary to cover the initial implementation of this Act shall be charged against the current year's appropriations of the Nuclear Regulatory Division of the PNRI and the Radiation Regulation Division of the CDRRHR responsible in ionizing radiation regulation. Thereafter, such sums as may be necessary for the continued implementation of this Act shall be included in the annual General Appropriations Act.

In addition, the PARC is authorized to receive contributions, grants, bequests, contributions, and donations, in cash or in kind, whether from local or foreign sources: Provided, that acceptance of grants, bequests, contributions and donations from foreign government shall be subject to the approval of the President of the Philippines upon the recommendation of the Commissioner of the PARC and the Secretary of the Department of Foreign Affairs (DFA).

**SECTION 67.** *Implementing Rules and Regulations.* – The PARC, in consultation with the DOST, DBM and the CSC shall issue within one hundred eighty (180) days, the rules and regulations necessary to implement the provisions of this Act.

**SECTION 68.** *Repealing Clause.* – If found inconsistent with this Act, be pertinent provisions of Republic Act No. 2067 as amended by RA 3589, otherwise known as the *Science Act of 1958*, Republic Act No. 5207 as amended by PD1404, otherwise known as the *Atomic Energy Regulatory and Liability Act of 1960*, Republic Act No. 9711 otherwise known as the *Food and Drug Administration Act of 2009*, Executive Order No. 128 Series of 1987 on *Reorganizing the National Science and Technology Authority* are hereby repealed. All other laws, executive orders, proclamations, rules, regulations, and other issuances or parts thereof which are inconsistent with the provisions of this act are hereby repealed or amended accordingly.

**SECTION 69.** *Separability Clause.* – If any provision of this Act shall be declared unconstitutional or invalid, the other provisions not otherwise affected shall remain in full force and effect.

**SECTION 70.** *Effectivity.* – This Act shall take effect fifteen (15) days from its publication in the Official Gazette or in a newspaper of general circulation.

Approved,
